

CampVac[®] SG 9R

Live vaccine against Fowl Typhoid
- *Salmonella Gallinarum*

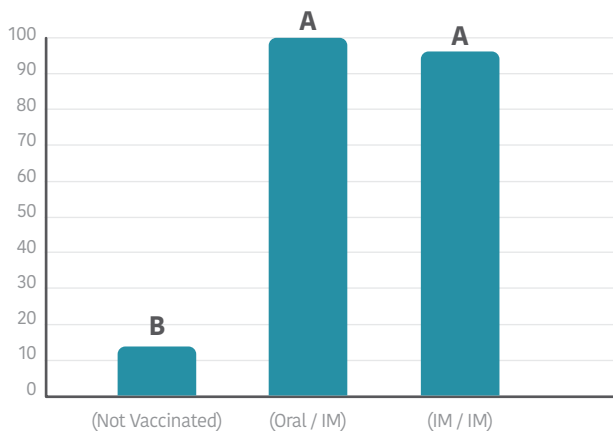

COMPARATIVE STUDY BETWEEN DIFFERENT ROUTES OF ADMINISTRATION

Survival rate - Protection

■ Nine (9)-week old hens challenged

(Not Vaccinated)	(-/IM)	(Oral/IM)
23,8	100	100

■ Thirteen (13)-week old hens challenged

(Not Vaccinated)	(Oral / IM)	(IM / IM)
10	100	95

PRESENTATION

- 200-ml vials containing 1,000 doses.

ADVANTAGES

- Efficient protection against Fowl Typhoid;
- Cross protection against *Salmonella* Enteritidis;
- Selected Clone 9R;
- Humor and cell response;
- Application by injection or orally;
- Broad protection and better viability of the flocks;
- Ease in the oral application and in booster vaccinations during production.

DOSE

0.2 ml/hen

For injection - IM / Orally - drinking water.
